

## DCCN-2023 Call for Papers

The Russian Academy of Sciences (RAS), the V.A. Trapeznikov Institute of Control Sciences of RAS (ICS RAS, Russia, Moscow), the Peoples' Friendship University of Russia (RUDN, Russia, Moscow), the National Research Tomsk State University (NR TSU, Russia, Tomsk), and the Institute of Information and Communication Technologies of Bulgarian Academy of Sciences (Bulgaria, Sofia) jointly organize the **26-th International Conference on**

### **DISTRIBUTED COMPUTER AND COMMUNICATION NETWORKS: CONTROL, COMPUTATION, COMMUNICATIONS (DCCN-2023)**

The DCCN-2023 conference will be held under the support of the IEEE (Russia Section Chapter, COM19) and will take place in ICS RAS, Moscow, on **25-29 September, 2023** with physical and/or virtual participation.

RUDN  
university

IEEE

Russia  
Section  
est. 1990

The Conference will bring together researchers and developers from academia and industry across various countries and working in the area of theory and applications of distributed computer and telecommunication networks, mathematical modeling, methods of control and optimization of distributed systems, by offering them a unique opportunity to share their views as well as discuss the perspective developments and pursue collaboration in this area. The DCCN-2023 conference is a continuation of traditional, international DCCN series, which were held in Russia, Bulgaria, and Israel over the recent 27 years. The working languages of the Conference are Russian and English.

**The topics of the Conference** include, but are not limited to the following fields:

- Analytical modeling and simulation of next-generation communication networks
- Centimeter- and millimeter-wave radio technologies
- Cloud computing, distributed and parallel systems
- Communication networks algorithms and protocols
- Computer and telecommunication networks control and management
- Evolution of wireless networks toward 5G/6G
- High-altitude telecommunications platforms
- Internet of Things and fog computing
- Machine learning, big data analysis, artificial intelligence
- Performance analysis, QoS/QoE evaluation, and network efficiency
- Probabilistic and statistical models in information systems
- Queuing theory and reliability theory applications
- Security in infocommunication systems
- Wireless and mobile networks

Prospective authors are encouraged to submit their papers (4-6 pages) in Russian or English via the on-line registration system (<https://uconfy.com/conf/13/>). The accepted papers will be published in the Conference Proceedings volume (included into the Russian Science Citation Index). After a peer review, selected submissions in English, recommended by the Program Committee, will also appear as a stand-alone volume of selected extended (12-15 pages) papers published by Springer (indexed in Scopus and Web of Science).

#### **Important dates:**

15 May 2023	Deadline for paper submissions (4-6 pages). Start of peer review.
15 June 2023	End of reviewing process. Notification of acceptance
01 July 2023	Deadline for camera-ready submissions (regular papers)
15 July 2023	Deadline for camera-ready submissions (extended papers)
